TRANSYLVANIA
UNIVERSITY

ABOUT THE MAJOR:

Digital Arts and Media is an interdisciplinary major that explores digital artistic practice and media production in the 21st century. You will develop your ability to produce and evaluate multimedia works from a variety of perspectives, with a focus on technique and aesthetics.

The program pulls in courses from several disciplines—including art, music technology, rhetoric, photography, film and computer science—to give you a broad base while allowing you to pursue your own interests as you discover your own interests within the field.

Transylvania has all the latest tools you'll need to create cutting-edge works of digital art and media, from video and audio editing equipment to 3D printers and programming software. The Digital Art Lab is fully equipped with a music studio and computers with programs widely used in the industry.

You will also have opportunities to present your work in a variety of ways, including the Morlan Gallery, the Studio 300 Digital Art and Music Festival, student recitals and through exhibits in and around Lexington. This is a hands-on, creative program that allows you to build your portfolio and prepare yourself for a career in digital media.
