PRE-HEALTH

Transylvania will help prepare you for success in medical, dental, pharmacy, veterinary science, physician's assistant and other health profession schools. Our broad curriculum exposes you to new ideas and builds your communication skills—a must for success in graduate school.

You'll work closely with our health profession advisors, who suggest prerequisites and prepare you for admission tests. You'll have opportunities to do research with your advisors, co-authoring papers for publications and presentations.

A solid background in the sciences is critical for a career in health, but you're free to select any major. You'll still take all the typical health prerequisites like biology, organic chemistry, physics and biochemistry.

Approximately 90 percent of the students we recommend to health profession schools are accepted, compared with a national acceptance rate of about 50 percent.

In addition, our students get priority applicant status at University of Kentucky graduate programs, including:

- College of Dentistry
- College of Health Sciences (Physician Assistant, Physical Therapy, Speech Language Pathologist)
- College of Medicine
- College of Pharmacy
- College of Public Health

Our 3-4 Pharmacy program gets you a three-year B.A. from Transy and a four-year Pharm.D. from UK.

Our classes prepare you to develop knowledge and the confidence that goes with it—a must for the practicing professional and helpful for tests like the MCAT, PCAT, DAT, etc. We also have problem-based learning labs and research-quality equipment for our students.

Eva Csuhai, professor of chemistry

SOME OF THE COURSES WE OFFER:

Anatomy and Physiology
Microbiology
Immunology
Advanced Cell Biology
Neuroscience
Athletic Injuries and Rehabilitation
Biomechanics
Calculus
Physics
Chemistry

OPPORTUNITIES IN THE PROGRAM:

Pre-Health Club
Phi Delta Epsilon honorary society
Clinical observation at hospitals or clinics
Shadowing health professionals
Interview skills, practice interviews
