

**BIOLOGY MAJOR: MOLECULAR AND CELLULAR  
BIOLOGY TRACK**

15 course units, including:

- BIO 1204 Integrated Concepts of Biology:  
Molecules and Cells
- BIO 1206 Integrated Concepts of Biology:  
Organisms and Ecosystems
- BIO 2042 Biologists' Toolkit
- BIO 4432 Capstone in Biology

6 biology courses, at least 3 from the following:

- BIO 3026 Developmental Biology
- BIO 3034 Molecular Genetics of Eukaryotes
- BIO 3044 Molecular Genetics of Bacteria
- BIO 3046 Microbiology
- BIO 3056 Bacterial Pathogenesis
- BIO 4144 Ecology
- BIO 4304 Advanced Cell Biology
- CHEM 3084 Biochemistry

**BIOLOGY MINOR:**

6½ course units, including:

- BIO 1204 Integrated Concepts of Biology:  
Molecules and Cells
- BIO 1206 Integrated Concepts of Biology:  
Organisms and Ecosystems
- BIO 2042 Biologist's Toolkit

3 additional biology courses, at least 1 from the 3000-level  
or above

Allied Course (1 of the following):

- CHEM 1004 Chemistry in Society
- CHEM 1055 Principles of Chemistry I
- CS 1124 Introduction to Computer Science with  
Programming
- MATH 1144 Elementary Statistics
- PHYS 1014 Conceptual Physics

**TRANSYLVANIA**  
UNIVERSITY

## ABOUT THE MAJOR:

The biology program prepares students for traditional fields of study as well as emerging fields such as biophysics, bioinformatics and molecular genetics.

In our small lab sessions, you'll be encouraged to sharpen your investigative skills by undertaking independent research. You'll gain first-hand knowledge of subjects through field trips to destinations such as Kentucky's Red River Gorge and Daniel Boone National Forest. May term travel courses have enabled students to study invertebrates in Florida, tropical ecology in Belize and Hawaii, native plants and animals in the forests of eastern Kentucky and public health issues in the Philippines.

The science of biology plays a central role in important issues like global climate change, stem cell research and ecological restoration, as well as global health issues such as avian influenza, tuberculosis and HIV/AIDS. Transylvania's biology graduates actively engage these issues, both as researchers in the laboratory and as medical personnel on the front lines.

Transylvania students have a variety of opportunities to conduct research, both independently and with professors. Research projects may receive funding from the university or from outside organizations such as the National Institutes of Health. Current faculty research interests include evolution and behavioral ecology of cannibalism, physiological and other correlates of avian personality and ecology of non-native plant invasions.

## FACULTY:

**Belinda Sly**, Professor of Biology  
bsly@transy.edu

**Sarah Bray**, Professor of Biology  
sbray@transy.edu

**Paul Duffin**, Associate Professor of Biology  
pduffin@transy.edu

**Mofolusho Falade**, Associate Professor of Biology  
mfalade@transy.edu

**Rebecca Fox**, Associate Professor of Biology  
rfox@transy.edu

**James Wagner**, Program Director  
Professor of Biology;  
jwagner@transy.edu

## COURSES OF SPECIAL INTEREST:

Molecular Genetics of Bacteria  
Entomology  
Animal Behavior  
Neurobiology  
Genetics  
Immunology  
Tropical Ecology  
Field Botany

## WHERE OUR GRADUATES HAVE WORKED:

National Oceanic and Atmospheric Administration  
Smithsonian Institution  
Mount Sinai Hospital  
National Rehabilitation Hospital in Washington, D.C.  
Boston Medical Center

## WHERE OUR GRADUATES HAVE STUDIED:

Harvard University  
Texas A&M Veterinary School  
University of Kentucky Dental School  
University of North Carolina–Chapel Hill  
Vanderbilt School of Medicine

## POSSIBLE CAREER OPTIONS:

Environmental protection agent  
Medical doctor  
Research scientist  
Teacher

## COURSES:

### BIOLOGY MAJOR:

15 course units, including:

BIO 1204 Integrated Concepts of Biology:  
Molecules and Cells  
BIO 1206 Integrated Concepts of Biology:  
Organisms and Ecosystems  
BIO 2042 Biologist's Toolkit  
BIO 4432 Capstone in Biology

9 additional electives, including 6 Biology courses at the 3000-level or above

### Allied Courses

CHEM 1055 Principles of Chemistry I  
CHEM 1065 Principles of Chemistry II  
MATH 1304 Calculus I or  
MATH 1144 Elementary Statistics

To become certified to teach biology, students must complete the Biology Major and the Education Minor for Secondary Certification.

### BIOLOGY MAJOR: ECOLOGY, EVOLUTION, AND BEHAVIOR TRACK

15 course units, including:

BIO 1204 Integrated Concepts of Biology:  
Molecules and Cells  
BIO 1206 Integrated Concepts of Biology:  
Organisms and Ecosystems  
BIO 2042 Biologists' Toolkit  
BIO 3204 Animal Behavior  
BIO 3314 Evolution  
BIO 4144 Ecology  
BIO 4432 Capstone in Biology

3 courses from the following:

BIO 2124 Field Botany  
BIO 2144 Tropical Ecology  
BIO 2164 Ornithology  
BIO 2504 Entomology  
BIO 3016 Comparative Vertebrate Anatomy  
BIO 3065 Animal Physiology

3 electives from BIO, CHEM, CS, ENVS, MATH or PHYS

*Continued on back*

"Our biology program provides foundational courses useful for a number of disciplines as well as diverse specialized courses such as Biology of Climate Change, Bacterial Pathogenesis and the Natural History of Kentucky. We stress content as well as critical thinking, problem-solving and data analysis."

Belinda Sly, associate professor of biology
